

DECHAWAT ROYDA

ABOUT ME

I am a programmer studying in college. When I'm working or studying something, I like to focus on it. I can work with other people and listen to the problems of those I work with. I have a background in programming. Work planning predicts what will happen BasicDataBase I'm looking for opportunities to use the skills I have. Learned to build the perfect website to enrich my experience.

EDUCATION

Bachelor's degree of Computer Engineering

King Mongkut's University of Technology Thonburi

📅 2021-2024(Junior) 📍 Thung Khru, Bangkok

SKILL

Programming language,
Framework , Tools

JavaScript

HTML

CSS

React.js

Node.js

Rest APIs

C

Python

Firebase

Basic MYSQL

MONGO DB

postman

Bootstrap

Tailwind CSS

Fixma

Adobe Photoshop

OTHER SKILL

The ability to analyzedata

Design skills

Leadership skills

Problem Solving Skills

Communication skills

EXEPERIENCE(WORK&STUDYING)

Technical Team of **BangmodHackathon2023(While term starts)**

Frontend(Website), 26 Sep.2022- 23 Oct.2022

Design Coding and test components for event registration forms.
Software design and performance requirements

Hire a thesis project **FishCare (Term Break)**

IOT & Database(Hardware), 23 Jun.2022- 7 Jul.2022

Design the scope of work and Estimated cost per project
Design coding and connect Database add to Node by ArduinoIDE
Create Database by Firbase(noSQL) and connect the newly created app.
Design and modify as required.

Finale Project Freshy **PlukKla (While term starts)**

IOT & Database(Hardware), 20 Sep.2021- 12 Dec.2021

► this project take care plant in greenhouse with use sensor and control
by timing you can set the time turn on or turn off of system via application

Finale Project Sophomore **Mayahi Hotel (While term starts)**

Frontend(Website), 14 March.2022- 13 May. 2022

► Hotel booking sites require registration and login. Choose a room to stay
, details in the room. Confirm and pay for the reservation.
There is another feature after booking a hotel room.
Guest transfers, event requests, additional dining services,
in-house board game borrowing. After that, the added features
will be used as an additional charge after booking.

Finale Project of Software Engineering **TOAA-NIUNG**

Frontend(Website), 28 Aug.2023- 11 Dec. 2023

► It's a project about booking a table. It's a simulator. People who reserve
a table will see a layout of the store as the store owner manages
the custom store.It is a website created for 1 store.
There are 2 roles: admin and general user.
Admin can manage user's account and can ban user.
Designed using fixma, then imported as code,
changing the class names to match the designed fixma.
